Woods® FZ22-2 Mower Combines Comfort and Performance

The new FZ22-2 zero-turn mower from Woods Equipment combines comfort and performance. The front-mount mowers have cutting decks mounted in front of the power unit, improving visibility and making it easier to trim around and cut under low growing trees and foliage.

With a long wheelbase, the FZ22-2 distributes weight more evenly. The full suspension adjustable seat is a standard feature which reduces operator fatigue, allowing hours of mowing comfort.

A TrueFloat™ deck follows the contour of the ground for better cut. It is available with a 54" or 61" deck, to achieve an adjustable cutting height of 1-5". The deck design features a fabricated 5" deep deck with welded bumper. A patented V-Baffle system creates strong suction, lifting grass for a precision cut and keeping dust under the deck.

The mower is built with a 22 hp Kawasaki V-Twin OHV gas engine, a cup holder, flip-up seat, and storage compartment. A standard roll-over protection system (ROPS) adds to operator safety.

A Woods FZ-Series mower can do more than cut grass. Owners will find year-round versatility with attachments like a grass and leaf collection system, dozer blade, snow thrower and broom. Accessories include a headlight kit to extend working hours, and a winter enclosure to stay warmer while moving snow.

See videos of the FZ22-2 mowers in action on the Woods Equipment Channel on YouTube®.
