Woods® New Pallet Forks Feature Walk-Thru Frame

Four new walk-thru pallet fork models add to Woods' extensive line of loader and skid steer attachments. The walk-thru frame and low step offer the operator easy access and optimum visibility when moving materials.

Choose from 2,200, 4,400 or 6,600 lb. fork capacity and fork lengths from 42 to 48 inches. All models are compatible with Skid Steer (ISO 24410), John Deere®, and Euro ISO 23206 Quick Attachments.

These new models are designed with a full-height frame and movable walk-thru cross bar, allowing relocation to fit your prime mover application. Standard features include a clevis for lifting from a single point on the frame, and a lift capacity that equals fork tine capacity.

The tines are made of certified (ISO Class 2A) forged steel for strength and long life. All new Pallet Fork models are robotically welded for the consistent high quality that owners expect from their Woods products.

See the full line of pallet forks, rotary cutters and all Woods agricultural, landscaping and construction products at woodsequipment.com.

To find your nearest Woods dealer, visit <https://www.woodsequipment.com> or call Dealer Services at 800-319-6637.

####

With a reputation for innovative, high-quality implements and attachments, Woods brand products are sold throughout North America – as well as in Europe, Latin America, and Australia – through a dealer network of agricultural, landscape and construction professionals. Woods products are manufactured to American Welding Society standards; tested in rigorous, real-life conditions; and comply with recommended industry safety standards. Woods, a brand of Blount International's Farm, Ranch and Agriculture Division, is headquartered in Oregon, Illinois. Visit woodsequipment.com for more information.
